

Sycamore Creek HOA Residents

Dear Resident:

We will be replacing the wood bridges in the complex with New Vinyl covered Bridges. We will begin each day at approx. 8:00 am and finish at approx. 5:00 pm. We will start installation/construction work with the first bridge ON **TUESDAY, September 12th 2017.**

Each bridge will take approximately 1 week to complete. Although the pool will remain open during construction of each bridge, we will close the access leading to the pool from the bridge at the beginning of each work week until completed.

In order to avoid damages to your personal property we request that: During construction, please make arrangements to keep any children and/or pets in your home during the daytime (8am-5pm).

- We will need to use the electrical outlet at the pool house to run our power tools whenever possible. However, extension cords will not reach all the time, in this case there will be a gas generator running throughout the day, we apologize in advance for the inconvenience.
- We may need to use minimal water from the pool house to mix our concrete and wash the bridges. (Please be careful, this could be a hazard and we would hate for anyone to trip over the water hose.)

There will be a dumpster on the premises for the recycling of the old wood bridges. This dumpster is to be used only for this purpose. This dumpster is for the exclusive use of Vinyl Concept employees.

Thank you in advance for your cooperation.
If you have questions or concerns regarding the installation of the bridges, please contact the Vinyl Concepts office at (805) 208-1927.

Sincerely,
Oscar A. Ramirez
